By moving the spaceship into the colored box, the color will be stored in that column.. Through a process that seems like magic (but what is simply ingenious programming code), Audiosurf analyzes any song the player chooses and creates a unique 3D level out of it.. Since the speed is measured by the song, players can only move left or right between several columns using either the keyboard's directional arrows, or by moving the mouse left or right.

For those with limited music libraries, Valve includes the entire The Orange Box soundtrack (which includes music from Half Life 2, Team Fortress, and Portal).. But for those of us with music libraries that stretch the capacity of a 30 gig iPod or Zune, The Orange Box soundtrack simply serves as a demo of its true capacity.. Each song played in Audiosurf is unique, and simply trying out different songs from various genres is an adventure in and of itself.. When playing Can't C Me by 2Pac, Audiosurf offers a bumpy ride with numerous tunnels to accenuate intense moments in the song.. Warmer colors such as red and yellow appear during tense moments during the song and are worth more points, while cooler colors such as blue and purple appear during more frequently during calm moments and as such are worth less points.. Ride Your Music is an apt slogan for this unique rhythm based puzzle game Audiosurf – Match 3 Colors on Music-based LevelsAfter loading up Audiosurf, players are prompted with the option to select a track.. You will have to navigate it using your levitating vehicle while collecting blocks that appear in sync with the music.. While the player's spaceship floats forward, various colored boxes slide down the track similar to Guitar Hero or Rock Band..
